Does the council think something here is wrong?

If you represent Pembrokeshire and think a figure here is wrong, out of date or unfairly presented, email hello@whereyourmoneygoes.co.uk with this page's address and the source you would point to. Every correction is logged, with its date, on the corrections page.

How much of the council's spending does this cover?

Council tax funds **31%** of this authority's budget. The rest comes from central government grant, business rates and fees. That is why a grant cut can raise your bill even when the council has not changed what it does, and why cutting council tax would not shrink services by the same proportion.

What this data does and doesn't show

- These are each body's own figures, as reported to government in its revenue outturn return. Net spending is after the fees, charges and grants a service brings in.
- Your bill is for 2026-27; it is shared out using the latest published return, which covers an earlier year. The mix of spending changes little from one year to the next, but it does change.
- Council tax is not ring-fenced: this shows your bill in proportion to spending, not what your money bought. Where a precept is set aside for adult social care, it is shown against adult social care.
- No council publishes spending at street or property level, so nothing here says what was spent near you.
- Sub-service lines are the ones the national returns itemise. Councils describe their own budgets differently; their budget books and statements of accounts have more detail.

Council car park (off-street) tariffs

Kept by the body that collects it the council's general fund. Section 55 covers on-street parking and enforcement income, not car park fees. Not verified
