Police officers, England and Wales, 31 March 2026
As of 22 July 2026

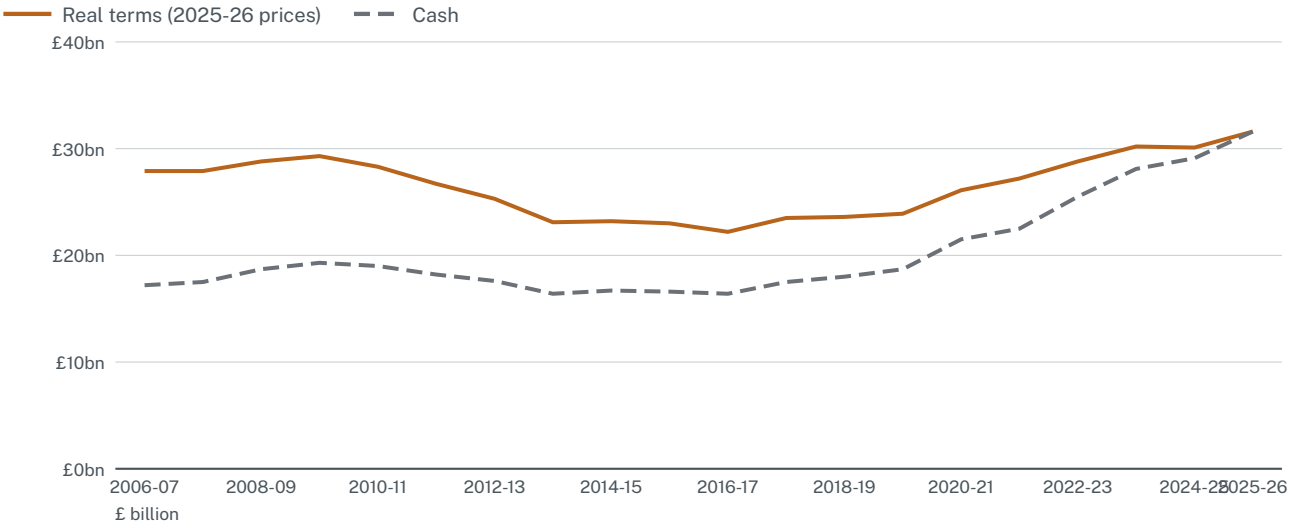

34.9%
Of force funding from the precept, 2026-27
As of 19 August 2026

The short version

- **Two sources of money:** Home Office grant and the council tax precept, which has grown faster since 2015-16.
- **Every force has a page:** its funding, precept per Band D home, officers, recorded crime, charge rate and 999 answering, against England and Wales and its most similar forces.
- **Side by side, not cause and effect:** recording practice differs, breaks are marked, and demand differs between areas.

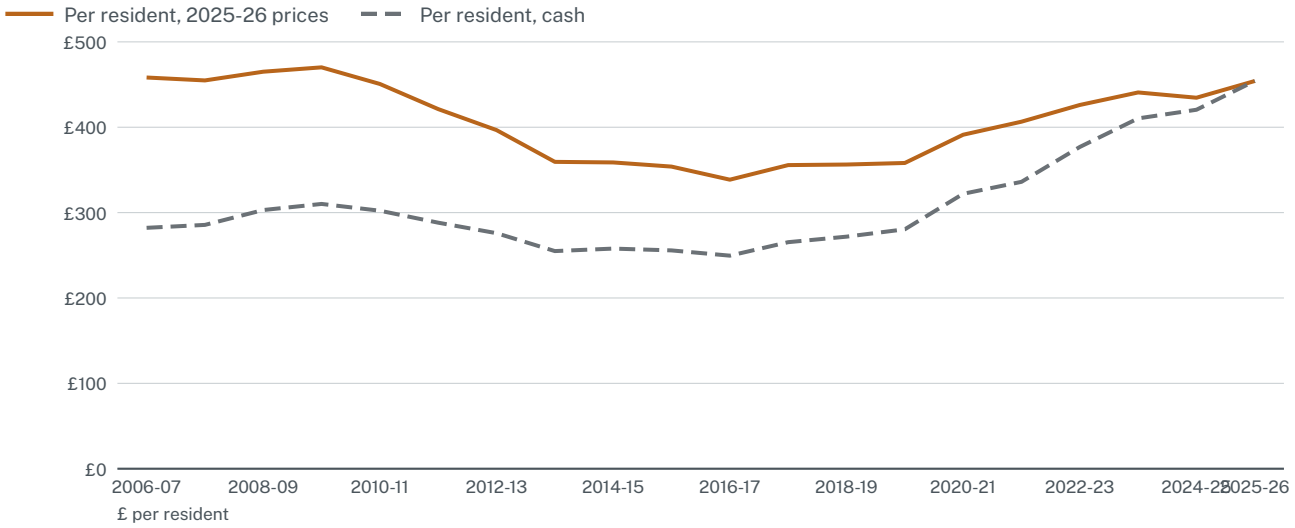

Over the longest run published: cash, real terms and per head

Police, United Kingdom: spending in cash and in 2025-26 prices, £ billion

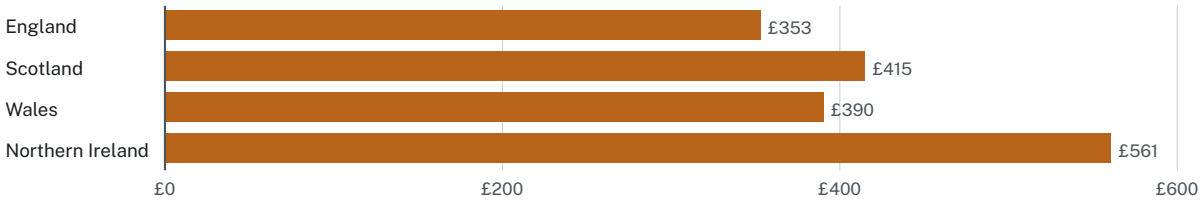

Line chart of Police, United Kingdom spending from 2006-07 to 2025-26: £17.2bn to £31.6bn in cash; £27.9bn to £31.6bn in 2025-26 prices.

Police, United Kingdom: spending per resident, 2025-26 prices

Line chart of Police, United Kingdom spending per resident in 2025-26 prices from 2006-07 (£458) to 2025-26 (£454).

Spending per resident by nation, 2025-26

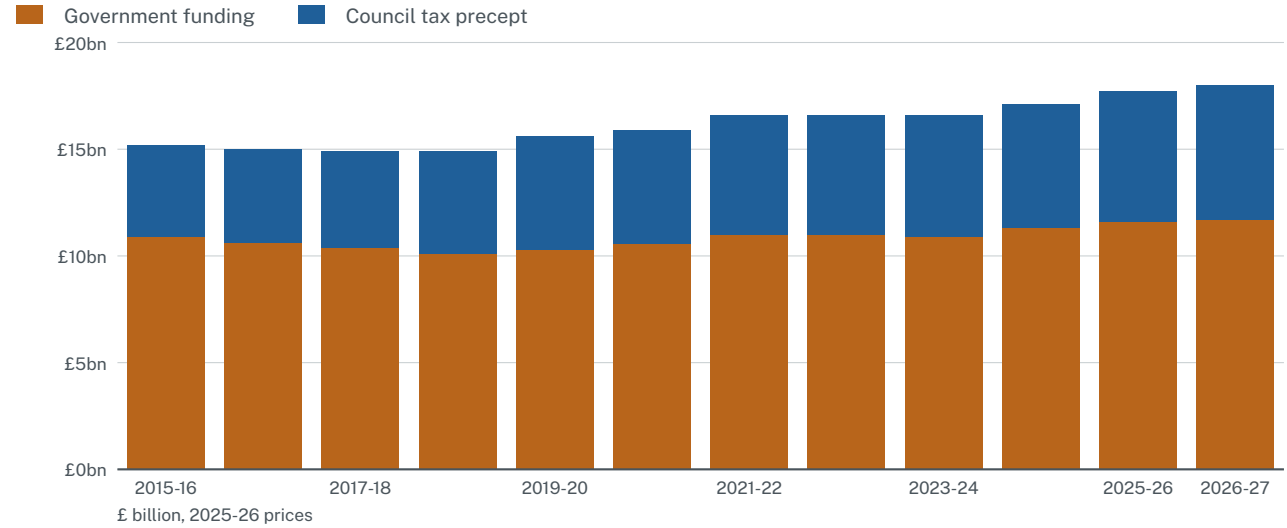

Bar chart of spending per resident by nation in 2025-26: England £353, Scotland £415, Wales £390, Northern Ireland £561.

Source: HM Treasury, PESA 2026: chapters 4 and 5 tables, published 16 July 2026; HM Treasury, PESA 2021: chapter 4 and 5 tables; HM Treasury, PESA 2016: chapter 4 and 5 tables; HM Treasury, PESA 2011: chapter 4 and 5 tables.

Grant or precept: where the money comes from

Forces in England and Wales have two main sources of money: grant from the Home Office (and, in Wales, the Welsh Government), and the police precept on council tax, set each year by the police and crime commissioner or mayor. The precept was 28.2% of their funding in 2015-16 and is 34.9% in 2026-27. Scotland and Northern Ireland have no police precept.

Police funding in England and Wales: government grant and council tax precept, 2025-26 prices, £ billion

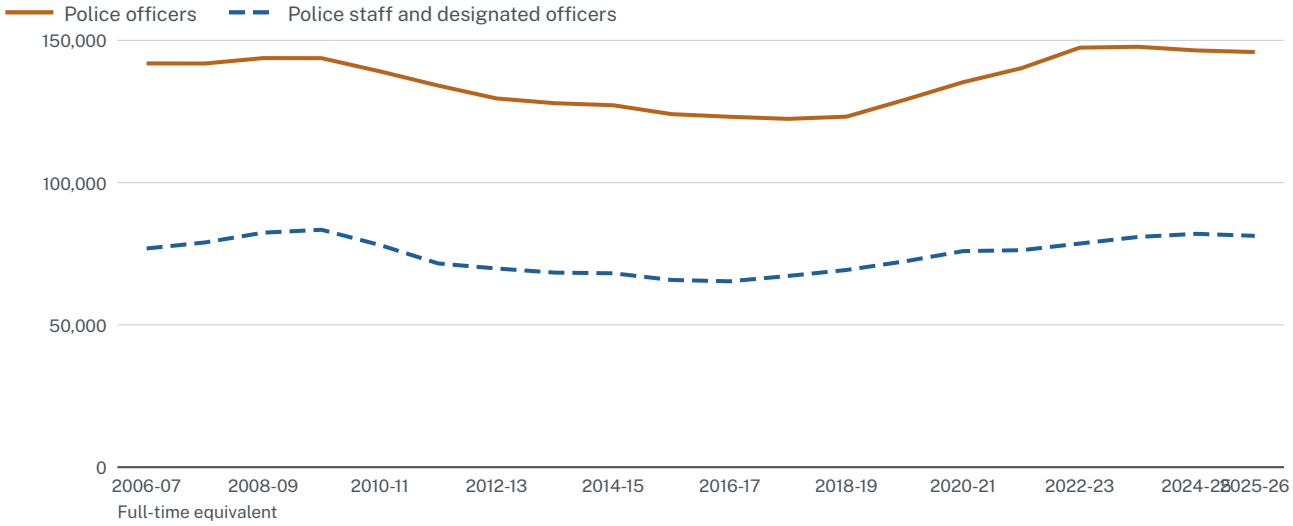

Stacked bar chart of police funding in England and Wales from 2015-16 to 2026-27: government funding £11.7bn and precept £6.3bn in 2026-27, in 2025-26 prices.

Source: Home Office, Police funding for England and Wales 2015 to 2027: data tables (Table 4a), published 19 August 2026.

Officers and staff over time

Police officers and staff in England and Wales, full-time equivalent, 31 March

Line chart of police officers in England and Wales from 2006-07 (141,894 officers) to 2025-26 (145,886 officers).

Police Scotland had 16,553 officers full-time equivalent officers at the end of September 2026. The PSNI had 6,444 officers on 01 September 2026.

Cash is as published. Real terms are in 2025-26 prices, using HM Treasury's GDP deflator. Per resident divides by ONS mid-year population for the area the body serves. Changes compare the same body in consecutive years.

Search the department's payments over £25,000

Every payment of £25,000 or more the department published for the latest year, as published. See every department's spending over £25,000 for what each covers.

Home Office published **17,668 payments** worth **£3.69bn** to 585 suppliers and recipients from August 2025 to July 2026 (12 of 12 months published). The Home Office's own files, which include its agencies (such as the Disclosure and Barring Service); the separate files for other bodies in the same publication (such as the IOPC) are not read.

- 29% of rows are under £25,000: the department lists individual lines of larger payments, or publishes some smaller ones. They are kept as published.
- 8 credits and refunds (negative amounts, £25,565 in all) are included, so totals are net.

Searching needs JavaScript. Every payment is in one JSON file.

Source: Home Office, spending over £25,000 on GOV.UK, Open Government Licence v3.0. 12 files read, newest updated 2026-09-24; every payment kept is in one JSON file.

On the map

An interactive map or explorer appears here on the live page.

The map covers the whole UK. Where the nations publish the same measure, they share one scale. Where they publish different ones, each nation is shaded against its own measure on its own scale, named in its own part of the legend, and the nations cannot be compared with each other. Where a nation publishes nothing for a measure, the map says so and links to what it publishes instead. Pick an area for its figures and a link to its page.

Wiltshire	£234	£298.27	159 per 100,000	55.8 per 1,000

What each measure counts

- **Funding per resident** Government funding plus precept, per resident, cash.
- **Police precept, Band D** The police part of a Band D council tax bill in the force area. In London the Mayor's police precept is part of the Greater London Authority's and is not published separately; City of London has no police precept.
- **Officers per 100,000 residents** Full-time equivalent officers per 100,000 residents: on 31 March in England and Wales (Home Office), at each quarter end in Scotland (Scottish Government), and on the date of the PSNI's strength figures in Northern Ireland. Forces with large visitor or commuter populations (London, the City) look high on this measure.
- **Recorded crime per 1,000 residents** Offences recorded by the force in the financial year, excluding fraud, per 1,000 residents: Home Office figures for England and Wales, and the PSNI's for Northern Ireland, which records under the same Home Office Counting Rules and offence groups. Recorded crime depends on what is reported and how each force records it; recording practice differs between forces and has changed over time. A higher rate is not in itself a sign of more crime or worse policing.

What people say about it

Should more of police funding come from council tax precepts?

Those who defend local precepts or want more local flexibility

- "The public were clear about what they were willing to contribute, with 66% supporting an increase, and I am grateful for the trust they have placed in us to ensure the best value for money." Clive Grunshaw (Labour), Police and Crime Commissioner for Lancashire, Lancashire Police and Crime Commissioner (2 February 2026) In the same release he says the police grant increase "is simply not enough to cover inflation and pay costs".
- "This is why I believe that supporting our policing teams has never been more important than it is today and I need to ensure the Chief Constable has the right tools to take the fight to the criminals." Lisa Townsend (Conservative), Police and Crime Commissioner for Surrey, Surrey Police and Crime

Commissioner (2 February 2024) Said when her 2024/25 precept rise went ahead.

- "The first is greater precept flexibility for forces such as Dorset that are already asking far more of local taxpayers than others." Edward Morello MP (Liberal Democrat), House of Commons (11 February 2026) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches). He also argues the current settlement disadvantages rural counties with small council tax bases.

Those who say the precept shifts the burden unfairly and central grant should carry more

- "The Government is relying on a hidden council tax bombshell to fund their half-hearted rise in police funding as they pass the buck to local families." Lisa Smart MP, Liberal Democrat home affairs spokesperson, Liberal Democrats (11 June 2025)
- "They cannot be treated as business as usual, nor should the burden of delivering them continue to be passed disproportionately to local communities through increases in the Council Tax precept." Roger Hirst and Joy Allen, joint finance leads, Association of Police and Crime Commissioners (22 December 2025) As quoted by Police Professional. "They" refers to national policing priorities.
- "When funding depends heavily on council tax capacity, areas with lower property values are structurally constrained, regardless of need or performance." Mary Kelly Foy MP (Labour), House of Commons (11 February 2026) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches).
- "The reliance on the police precept entrenches a postcode lottery in policing." Matt Vickers MP (Conservative), shadow policing minister, House of Commons (11 February 2026) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches).

Views are attributed to the people and organisations named, with the date and a link to where they said it. This site takes no side.

Do more officers mean less crime?

Those who say officer numbers matter

- "The heartbeat of our Great British policing tradition is seeing bobbies on the beat, but for too long, too many communities have been feeling abandoned as crime soared and neighbourhood police disappeared, even when local crimes like shop theft, street theft or blatant drug dealing rose sharply." Yvette Cooper MP (Labour), then Home Secretary, Home Office / 10 Downing Street (10 April 2025) Government press release as republished by Wired-Gov.
- "Today, we've seen the direct result –1,300 officers gone, recruitment down 17 per cent, and 5,400 police jobs at risk, at the very moment knife crime is surging and confidence is collapsing." Chris Philp MP (Conservative), shadow Home Secretary, Conservative Party (25 July 2025) As published on the website of Andrew Snowden MP.
- "If the Government are serious about restoring neighbourhood policing, they need to step up, get this reform right and get more officers back on to our streets." Max Wilkinson MP (Liberal Democrat), House of Commons (11 February 2026) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches).

Those who say deployment, experience or productivity matter more than headcount

- "Redirecting resources into better technology, improving data-sharing across agencies, and enabling forces to pool specialist capabilities with a view to increasing productivity may yield greater returns than a narrow political focus on putting more boots on the ground." Sophie Davis, director of research, Crest Advisory (12 June 2025) The same paragraph says Crest research found the 20,000-officer uplift "had only limited effects on outcomes".
- "Having listened to feedback from police chiefs, police and crime commissioners, Select Committees and His Majesty's inspectorate of constabulary and fire and rescue services and others, we are removing arbitrary headcount targets for overall officer numbers." Sarah Jones MP (Labour), Minister for Policing and Crime, House of Commons (11 February 2026) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches).

- “There are big problems in the police but it's not clear that the number of officers is the most pressing; forces are struggling to rebuild public trust, charge rates remain low.” Matthew Fright and Gil Richards, Institute for Government (26 April 2023) Older than the preferred 2024-26 window.

Views are attributed to the people and organisations named, with the date and a link to where they said it. This site takes no side.

What these figures do and don't show

- **Recorded crime is not all crime.** It counts what is reported to the police and recorded under the Home Office Counting Rules. Recording practice differs between forces and has changed over time; the Crime Survey for England and Wales is the better guide to national trends.
- **Breaks in the series are marked.** After the inspectorate found in 2014 that one crime in five was not being recorded, recording improved, which pushed counts up from 2014-15; a rule change in May 2023 lowered some counts; and from April 2025 shop theft with force is counted as robbery.
- **Nothing here shows cause and effect.** Funding, officers, recorded crime, charge rates and call answering are shown side by side. A force with more money or more officers per resident may face more demand; a higher crime rate may reflect better recording.
- **Areas differ.** Rates divide by residents, but London and city-centre forces serve many commuters and visitors who are not residents. The Home Office's most similar forces are the fairest comparison it publishes.
- **Budget years are plans.** The latest funding year is the budget; earlier years are revised as in-year grants are shared out.

Figures from data/services/police.json, generated 19 November 2026.

Fire and rescue: funding, staff, stations and incidents

Public services · Last updated 19 November 2026 · https://whereyourmoneygoes.co.uk/fire-and-rescue/

£4.2bn was spent on fire and rescue in Fire and rescue, United Kingdom in 2025-26, **£59.96** per resident. That is +1.9% on a year earlier after inflation (+5.3% in cash). In 2025-26 prices it has gone from £4.4bn in 2006-07 to £4.2bn. English services attended 169,642 incidents in 2026-27, and reached primary fires in 9.5 minutes on average.

As of 16 July 2026

The short version

- **Funded locally and nationally:** English and Welsh fire authorities through council tax and the local government settlement; Scotland and Northern Ireland each have one national service.
- **Every service has a page:** its spending, incidents, response times (England), staff and stations, against its nation.
- **Response times are only published for England,** so they are never compared across nations.

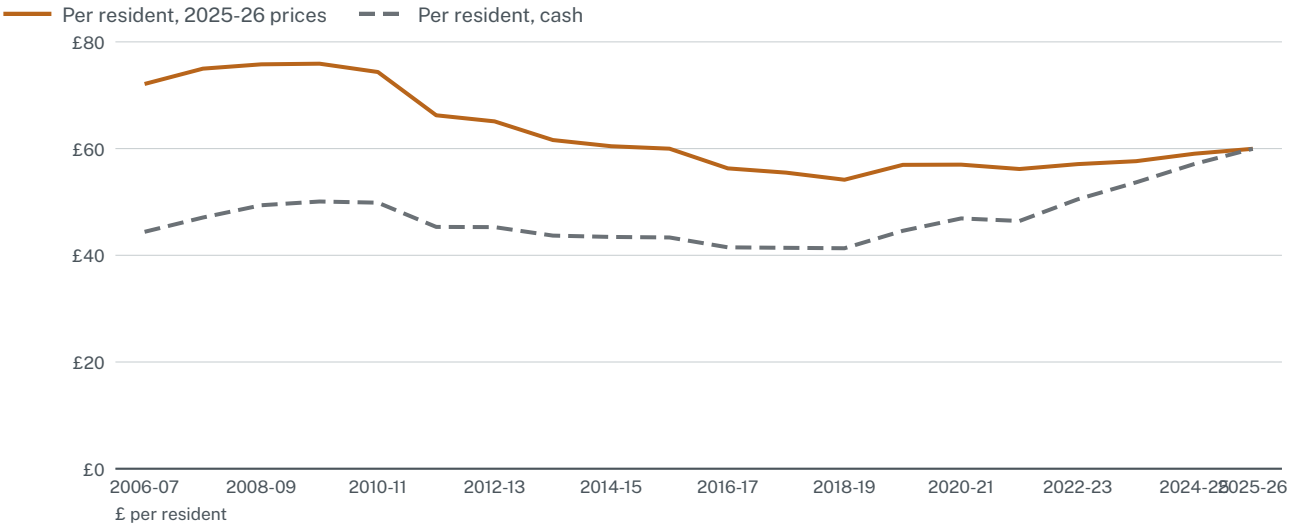

Over the longest run published: cash, real terms and per head

Fire and rescue, United Kingdom: spending in cash and in 2025-26 prices, £ million

Line chart of Fire and rescue, United Kingdom spending from 2006-07 to 2025-26: £2.7bn to £4.2bn in cash; £4.4bn to £4.2bn in 2025-26 prices.

Fire and rescue, United Kingdom: spending per resident, 2025-26 prices

Line chart of Fire and rescue, United Kingdom spending per resident in 2025-26 prices from 2006-07 (£72.11) to 2025-26 (£59.96).

Spending per resident by nation, 2025-26

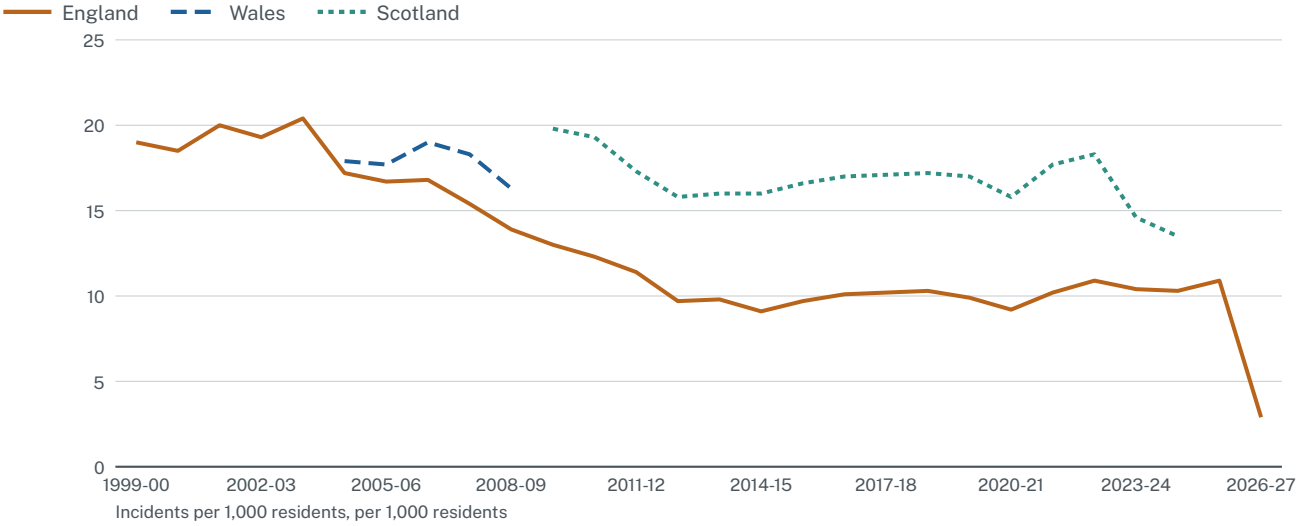

Bar chart of spending per resident by nation in 2025-26: Fire and rescue, England £55.41, Fire and rescue, Scotland £92.33, Fire and rescue, Wales £72.44, Fire and rescue, Northern Ireland £67.93.

Incidents and response

Incidents attended per 1,000 residents

Line chart of incidents per 1,000 residents from 1999-00 to 2026-27 for England, Wales, Scotland.

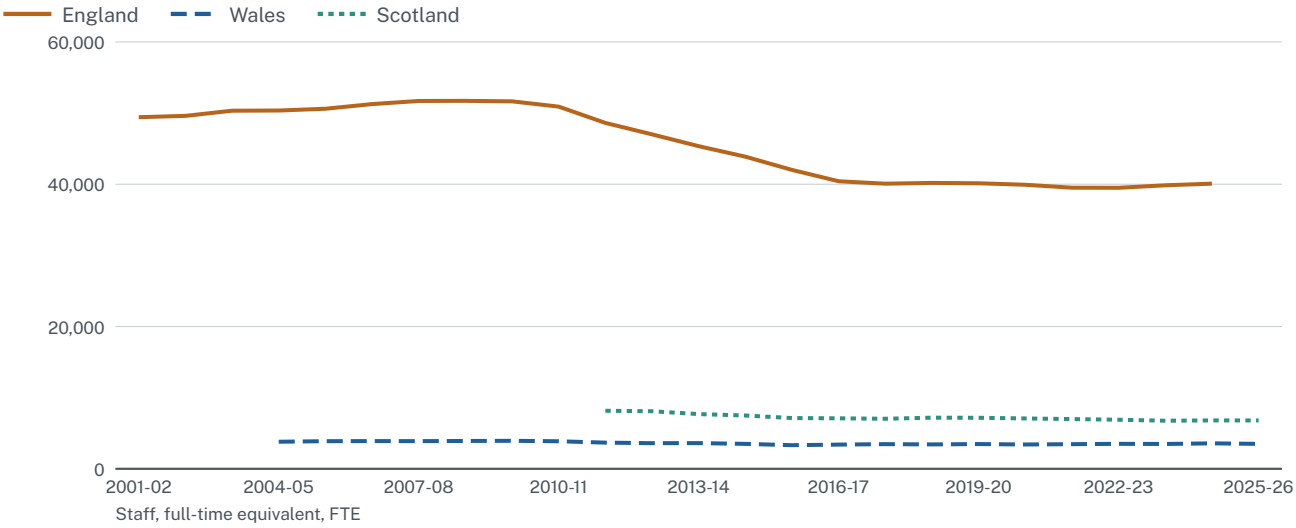

Average response time to primary fires, England, minutes

Line chart of average response time to primary fires from 2010-11 to 2026-27 for England.

Staff and stations

Fire and rescue staff, full-time equivalent

Line chart of staff, full-time equivalent from 2001-02 to 2025-26 for England, Wales, Scotland.

Which nations publish response times

- **England** Published by service every quarter (MHCLG FIRE1001), from 1994-95.
- **Wales** The Welsh Government's fire and rescue incident statistics give the share of primary fires (and of dwelling fires) where the first vehicle arrived within 10 minutes of mobilisation, by authority, in the text; StatsWales has no response-time dataset.
- **Scotland** Not in SFRS's official statistics (Fire and Rescue Incident Statistics, Fire Safety and Organisational Statistics); SFRS reports local performance to each council, with no national response-time series.
- **Northern Ireland** NIFRS reports the share of incidents reached within its attendance standards (SPI 9: 10 minutes in wholetime station areas, 20 minutes in on-call areas) in its annual report, not an average time.

Cash is as published. Real terms are in 2025-26 prices, using HM Treasury's GDP deflator. Per resident divides by ONS mid-year population for the area the body serves. Changes compare the same body in consecutive years.

On the map

An interactive map or explorer appears here on the live page.

The map covers the whole UK. Where the nations publish the same measure, they share one scale. Where they publish different ones, each nation is shaded against its own measure on its own scale, named in its own part of the legend, and the nations cannot be compared with each other. Where a nation publishes nothing for a measure, the map says so and links to what it publishes instead. Pick an area for its figures and a link to its page.

Every one of the fire and rescue services, on each measure on the map England, Wales and Scotland: Incidents attended per 1,000 residents, 2025-26 and 2008-09 and 2024-25. Northern Ireland: Incidents mobilised to per 1,000 residents, 2024-25. The nations' figures are different measures and are not directly comparable.

Fire and rescue area	Nation	Incidents	Fires	Response	Homes
Cleveland Fire Brigade	England	18.3 per 1,000 residents	9.92 per 1,000 residents	7.90 minutes	7.26 minutes
Mid and West Wales Fire and Rescue Service	Wales	18.0 per 1,000 residents	6.07 per 1,000 residents	50%	59%

West Yorkshire Fire and Rescue Service	10.8 per 1,000 residents	9.24 minutes	1,354 FTE	40 stations

What each measure counts

- **Incidents per 1,000 residents** Incidents attended divided by the mid-year population of the area the service covers (the sum of its local authorities), times 1,000. Worked out for England, Wales and Scotland, whose counts are made the same way; not for Northern Ireland, whose count is on its annual report's own basis.
- **Average response time to primary fires** Mean time from the call being received to the first vehicle arriving, for primary fires (fires in buildings, vehicles and outdoor structures, or with a casualty or rescue, or attended by five or more appliances). England only (MHCLG FIRE1001, from the Incident Recording System). Wales publishes the share reached within 10 minutes of mobilisation (response-primary-wa) and Northern Ireland the share of all incidents reached within its standard (response-primary-ni); Scotland publishes no response times.
- **Staff, full-time equivalent** All staff in post at 31 March (wholetime and on-call firefighters, fire control and support staff), full-time equivalent. England: FIRE1101; Wales: StatsWales; Scotland: SFRS, excluding volunteers. Northern Ireland: the average number employed in the year, from the annual accounts. On-call firefighters' FTE is counted differently between the nations.
- **Fire stations** Fire stations at 31 March (England FIRE1404; Wales StatsWales; Scotland SFRS; Northern Ireland annual report). Specialist urban search and rescue bases are not counted.

What people say about it

Is fire and rescue funded adequately?

Those who say fire and rescue is underfunded and cuts have hurt

- "Cuts to the emergency services will cost lives. It is a matter of time until someone dies." Steve Wright, general secretary, Fire Brigades Union (21 August 2025)
- "The unfair funding settlement could mean fire engines arriving at emergencies without enough crew to respond effectively and save lives, or, worse still, engines not leaving stations at all because there are no firefighters to staff them." Matt Vickers MP (Conservative), shadow minister for crime, policing and fire, House of Commons (28 April 2026) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches).
- "Employees of Devon and Somerset Fire and Rescue Service tell me that funding cuts have seen shift systems worsening; rope, water and animal rescue services being scaled back and watches usually running with around six firefighters instead of nine." Adam Dance MP (Liberal Democrat), House of Commons (28 April 2026) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches).

Those who say productivity and reform are the main issue

- "I am pleased to report that most services are now increasing their focus on improving productivity. But some services still need to better understand how they use their wholetime firefighters and take a more proactive approach to maximise efficiency." Sir Andy Cooke, HM Chief Inspector of Fire and Rescue Services, HMICFRS (5 November 2025) State of Fire and Rescue 2024-25. The same report also says the Government should reconsider its position on capital funding for fire services.
- "Funding is only one part of the picture. There is exciting work ahead of us." Samantha Dixon MP (Labour), Parliamentary Under-Secretary, MHCLG, House of Commons (28 April 2026) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches). Said after describing the ministerial advisory group's work on reforming the role of the firefighter, funding and governance. In the same speech she blamed past cuts for a 20% loss of firefighter capacity.

Views are attributed to the people and organisations named, with the date and a link to where they said it. This site takes no side.

What these figures do and don't show

- **Incidents are not only fires.** Fire and rescue services also attend road accidents, floods, other emergencies and false alarms; the figures say which is which.
- **Response times are published for England only.** Wales and Scotland publish none by service, and Northern Ireland reports against its own attendance standards, so no response time is compared across nations.
- **Nations count differently.** Each nation's statistics define incidents, staff and deaths in their own way; figures are compared within a nation, and across nations only where the definitions match.
- **Nothing here shows cause and effect.** Money, staff, stations and incidents are shown side by side. A service covering a large rural area needs more stations for the same number of incidents.
- **Appliance counts stopped in 2021** in England; the last published figure is marked as such.

Figures from data/services/fire.json, generated 19 November 2026.

Ambulance services: funding, staff and response times

Public services · Last updated 19 November 2026 · https://whereyourmoneygoes.co.uk/ambulance/

£5.5bn was spent on ambulance services in Ambulance services, United Kingdom in 2024-25, **£78.80** per resident. That is +4.6% on a year earlier after inflation (+8.7% in cash). In 2025-26 prices it has gone from £5.4bn in 2023-24 to £5.6bn.

Spending per resident by nation, 2024-25

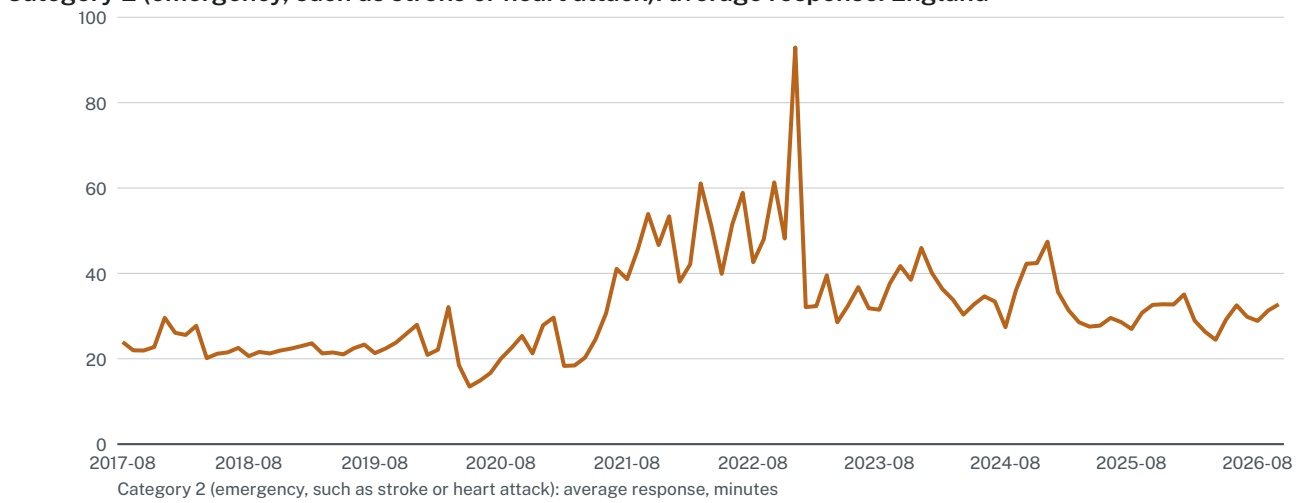

Bar chart of spending per resident by nation in 2024-25: England £76.15, Scotland £86.36, Wales £102, Northern Ireland £98.72.

Source: NHS England, NHS providers: trust accounts consolidation (TAC) data, 2024/25, 2022/23, 2020/21 accounts; Welsh Ambulance Services University NHS Trust, Welsh Ambulance Services University NHS Trust, Annual Report and Accounts 2025-26; Welsh Ambulance Services University NHS Trust, Welsh Ambulance Services University NHS Trust, Annual Report and Accounts 2023-24; Scottish Ambulance Service, Scottish Ambulance Service Board, Annual Report and Accounts 2024-25; Northern Ireland Ambulance Service Health and Social Care Trust, Northern Ireland Ambulance Service HSC Trust, Annual Report and Accounts 2025-26; Northern Ireland Ambulance Service Health and Social Care Trust, Northern Ireland Ambulance Service HSC Trust, Annual Report and Accounts 2024-25.

Response times

Category 2 (emergency, such as stroke or heart attack): average response: England

Line chart of category 2 (emergency, such as stroke or heart attack): average response for England from 2017-08 to 2026-10, latest 32.8 minutes.

Ambulance response by nation, each on its own measure

Nation	Most urgent calls	Next most urgent	Staff
England	Category 1 mean: 8.0 minutes (2026-10)	Category 2 mean: 32.8 minutes (2026-10)	55,481 FTE (2026-08)
Wales	Purple median: 7.5 minutes (2026-09)	Red median: 9.5 minutes (2026-09)	4,229 FTE (2026-06)
Scotland	Purple median: 7.1 minutes (2026-11-09)	Red median: 9.9 minutes (2026-11-09)	5,480 FTE (2024-25)
Northern Ireland	Category 1 mean: 11.8 minutes (2026-03)	Category 2 mean: 76.6 minutes (2026-03)	1,594 FTE (2026-06)

Each nation defines its categories and measures differently (means in England and Northern Ireland, medians in Wales and Scotland), so the rows are not a ranking.

Vehicles

- **England:** NHS England does not publish how many ambulances or other vehicles each trust has. Some trusts give a fleet size in their own annual or sustainability reports, but not on a common basis.
- **Wales:** Not published as a total. The Welsh Ambulance Service's 2025-26 annual report gives only the vehicles approved for replacement in the year (141, of which 44 emergency ambulances).
- **Scotland:** The Scottish Ambulance Service's sustainability report lists its fleet by vehicle type, but not as an official statistic and not in a form that could be read reliably, so no figure is shown.
- **Northern Ireland:** Not published in the Department of Health's statistics.

Northern Ireland

Northern Ireland has one national ambulance service; the figure is its own accounts.

£153m in 2025-26 (cash); £153m in 2025-26 prices; £79.22 per resident; −19.7% on a year earlier in cash, −22.3% in real terms.

Northern Ireland: by department or service body, 2025-26

Department or service body	Cash, 2025-26	Real terms (2025-26 prices)	Per resident	Real change on a year earlier	Source	Below this
Northern Ireland Ambulance Service Health and Social Care Trust	£153m	£153m	£79.22	−22.3%	Northern Ireland Ambulance Service Health and Social Care Trust	On its own page

Cash is as published. Real terms are in 2025-26 prices, using HM Treasury's GDP deflator. Per resident divides by ONS mid-year population for the area the body serves. Changes compare the same body in consecutive years.

What comes out: results by body

These are outputs and results published alongside the money. They are not what the money bought: demand, geography and recording practice differ between areas, and none of these figures shows cause and effect.

Each English ambulance trust: response times, handovers and incidents

Body	Category 1 (life-threatening): average response, 2026-10	Category 2 (emergency, such as stroke or heart attack): average response, 2026-10	Handovers taking over an hour, 2026-10	Incidents per 1,000 residents, 2026-10
England	8.0 minutes	32.8 minutes	8.8%	14.8 per 1,000 residents
East Midlands Ambulance Service NHS Trust	9.1 minutes	40.8 minutes	16.5%	15.1 per 1,000 residents
East of England Ambulance Service NHS Trust	8.5 minutes	45.2 minutes	20.6%	13.3 per 1,000 residents
Isle of Wight NHS Trust (ambulance service)	9.2 minutes	25.0 minutes	4.6%	18.5 per 1,000 residents
London Ambulance Service NHS Trust	7.3 minutes	32.0 minutes	1.7%	15.1 per 1,000 residents
North East Ambulance Service NHS Foundation Trust	5.6 minutes	20.6 minutes	3.8%	16.3 per 1,000 residents
North West Ambulance Service NHS Trust	7.1 minutes	24.8 minutes	8.2%	14.4 per 1,000 residents
South Central Ambulance Service NHS Foundation Trust	8.8 minutes	34.0 minutes	1.9%	12.1 per 1,000 residents
South East Coast Ambulance Service NHS Foundation Trust	7.3 minutes	28.9 minutes	1.0%	14.7 per 1,000 residents
South Western Ambulance Service NHS Foundation Trust	9.4 minutes	42.3 minutes	9.6%	15.6 per 1,000 residents
West Midlands Ambulance Service University NHS Foundation Trust	8.2 minutes	25.1 minutes	22.4%	15.2 per 1,000 residents
Yorkshire Ambulance Service NHS Trust	8.3 minutes	28.0 minutes	0.9%	16.4 per 1,000 residents

What each measure counts

- **Category 1 (life-threatening): average response** Mean time from the call to the first ambulance response arriving, for category 1 calls (cardiac arrest and other life-threatening conditions), against the national ambulance response standards for England (Ambulance Response Programme, 2017). Target: 7 minutes (category 1 mean).
- **Category 2 (emergency, such as stroke or heart attack): average response** Mean response time for category 2 calls. The standard is 18 minutes; NHS England's planning ambition for 2025-26 was a mean of 30 minutes. Target: 18 minutes (category 2 mean).
- **Handovers taking over an hour** Share of handovers with a known time that took over 60 minutes (AmbSYS A146 ÷ A140).
- **Incidents per 1,000 residents** Incidents in the month per 1,000 residents of the area the trust serves (ONS mid-year estimates; the area is the trust's integrated care boards).

What people say about it

What is behind ambulance delays?

Those who say ambulance service funding and capacity are the main cause

- “The greatest pressure used to be in winter but underfunding and staff shortages now mean it's frantic all year round.” Helga Pile, head of health, UNISON (6 June 2025)
- “Without enough staff, ambulances cannot operate at full capacity and response times suffer.” Jas Athwal MP (Labour), House of Commons (6 March 2025) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches).
- “Ambulance services are under incredible pressure but resources have not increased in line with rising demand.” Rachel Harrison, national officer, GMB (30 January 2020) Older statement (2020), outside the preferred window.

Those who say hospital handover delays and social care flow are the main cause

- “Hospital handover delays continue to be a major issue affecting ambulance service performance and the quality of patient care, as they have been for several years now, something the data underlines heavily.” Anna Parry, managing director, Association of Ambulance Chief Executives (23 April 2025)
- “A huge amount of time is lost to ambulance handover delays because there is no space for patients.” Ashley Dalton MP (Labour), Parliamentary Under-Secretary for Health, House of Commons (6 March 2025) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches).
- “Inability to admit to hospital is a key point in the handover delay problem, and the social care talks are a key measure in solving it.” Helen Morgan MP, Liberal Democrat health spokesperson, House of Commons (6 March 2025) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches).

Views are attributed to the people and organisations named, with the date and a link to where they said it. This site takes no side.

What these figures do and don't show

- **Each nation measures response times its own way.** England uses categories 1 to 4 with national standards; Wales moved to a new model in July 2025, which breaks its series; Scotland and Northern Ireland publish their own measures. Times are compared within a nation, never across.
- **No Treasury figure for ambulances.** HM Treasury counts ambulance services inside medical services, so the UK figure here is the sum of the services’ own accounts, for years all of them have.
- **Handover delays are hospital as well as ambulance.** Time lost at hospital handover depends on the hospital’s capacity as much as on the ambulance service.
- **Vehicle numbers are not published** as official statistics for any nation.
- **Nothing here shows cause and effect.**

Search and rescue: what the taxpayer funds and what charities do

Public services · Last updated 19 November 2026 · https://whereyourmoneygoes.co.uk/search-and-rescue/

£451m was spent on HM Coastguard in HM Coastguard, United Kingdom in 2025-26, **£6.49** per resident. That is +0.8% on a year earlier after inflation (+4.2% in cash). In 2025-26 prices it has gone from £448m in 2024-25 to £451m. The RNLI, which runs most lifeboats, had £251.3m of income in its latest accounts, 60% of it from legacies, and reported £4.4m of government money. The 21 air ambulance charities had £305.2m between them.

HM Coastguard, United Kingdom

The taxpayer-funded part of search and rescue: the Maritime and Coastguard Agency's net operating spending, which also covers ship safety and other work.

£451m in 2025-26 (cash); £451m in 2025-26 prices; £6.49 per resident; +4.2% on a year earlier in cash, +0.8% in real terms.

HM Coastguard, United Kingdom: by department or service body, 2025-26

Department or service body	Cash, 2025-26	Real terms (2025-26 prices)	Per resident	Real change on a year earlier	Source	Below this
Maritime and Coastguard Agency	£451m	£451m	£6.49	+0.8%	Maritime and Coastguard Agency	Broken down below

Maritime and Coastguard Agency

£451m in 2025-26 (cash); £451m in 2025-26 prices; £6.49 per resident; +4.2% on a year earlier in cash, +0.8% in real terms.

Maritime and Coastguard Agency: by spending category, 2025-26

Spending category	Cash, 2025-26	Real terms (2025-26 prices)	Per resident	Real change on a year earlier	Source	Below this
Coastguard operations, ship safety and the rest of the agency	£254m	£254m	£3.65	+7.3%	Maritime and Coastguard Agency	Line or transaction not published: The agency's accounts do not split the rest of its spending between coastguard operations and its other work.
Search and rescue aviation	£197m	£197m	£2.84	−6.5%	Maritime and Coastguard Agency	Line or transaction not published: The accounts give the helicopter contract's standing, flying and fuel charges in a note, not as data.

Cash is as published. Real terms are in 2025-26 prices, using HM Treasury's GDP deflator. Per resident divides by ONS mid-year population for the area the body serves. Changes compare the same body in consecutive years.

Who pays for what

Who pays: taxpayer-funded and charity-funded rescue services, latest year each

Service	Paid for by	Spending	Government money in it
HM Coastguard (Maritime and Coastguard Agency)	The taxpayer	£451m	all of it
Air ambulance charities (21 charities)	Donations, legacies, lotteries and shops	£281.4m	£3.2m
Lifeboats (RNLI and independent) (24 charities)	Donations, legacies, lotteries and shops	£250.7m (not all reported)	£4.4m
Mountain rescue (48 charities)	Donations, legacies, lotteries and shops	£8.6m	none reported
Lowland search and rescue (73 charities)	Donations, legacies, lotteries and shops	£50k (not all reported)	none reported
Cave rescue (1 charities)	Donations, legacies, lotteries and shops	£20k	not reported

Charity accounts checked against the registers on 24 September 2026.

Air ambulances

Most of the UK's air ambulances are run by charities. The NHS ambulance services dispatch them and, in many areas, supply the doctors and paramedics on board; Scotland also has two helicopters and planes of its own, run by the Scottish Ambulance Service. The helicopters, pilots and bases are paid for by donations.

Lifeboats, mountain, lowland and cave rescue

Lifeboat and rescue charities, latest accounts filed

Charity	Income	Spending	Of income from legacies	Government money reported	Reserves, months of spending	Year ending
Royal National Lifeboat Institution (RNLI)	£251.3m	£250.7m	60%	£4.4m	7	Dec 2024
Mountain Rescue England and Wales (the national body)	£1.3m	£1.3m	22%	none	14	Dec 2024
Scottish Mountain Rescue	£1.5m	£1.3m	—	not reported	—	Mar 2025
Association of Lowland Search and Rescue	£90k	£50k	—	not reported	—	Mar 2025
British Cave Rescue Council	£14k	£15k	—	not reported	—	Jan 2025

Rescue team charities counted together

Group	Charities	Income	How counted
Mountain rescue team charities, England and Wales	46	£6.8m	Registered charities with 'mountain rescue' in their name, latest accounts on the register; some teams are named differently or are too small to register.
Lowland search and rescue team charities, England and Wales	72	£3.8m	Registered charities with 'lowland' or 'search and rescue' in their name, latest accounts on the register.
Independent lifeboat charities	23	£2.5m	Registered charities running lifeboats outside the RNLI, found by name, latest accounts on the register.

What people say about it

Should lifeboats, air ambulances and mountain rescue get more state funding?

Those who argue for more state funding

- “Government funding would make a major difference, including by helping to upgrade vessels, crew equipment and communication devices, which are all vital to saving lives at sea.” Paul Holmes MP (Conservative), House of Commons (29 October 2025) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches). He asked for the rescue boat grant fund for independent lifeboats to be reinstated.
- “That is why we in the Liberal Democrats are encouraging the Government to increase their support for independent lifeboat organisations through targeted, practical assistance that strengthens the work of these volunteer teams.” Steff Aquarone MP (Liberal Democrat), House of Commons (29 October 2025) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches).
- “The 2025 autumn Budget included the exemption of search and rescue vehicles from vehicle excise duty but, although that was warmly received, it does not address the structural funding gap that these organisations face.” Lisa Smart MP (Liberal Democrat), House of Commons (22 April 2026) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches). Debate on mountain rescue.

Those who stress independence from government funding

- “We will not seek funding from central government if this could jeopardise our independence.” RNLI (stated philosophy), Royal National Lifeboat Institution (5 August 2025) Undated policy page; date is the Internet Archive capture used to check the wording (rnli.org blocks automated fetches).
- “For all these institutions, their strength comes from their independence. Although state provision can provide funding and coverage, it comes at the very significant cost of disenfranchising local communities.” Jerome Mayhew MP (Conservative), House of Commons (29 October 2025) Checked against the official Hansard text via the Hansard API (the web page blocks automated fetches). He also backed restoring capital grants, saying "there is a difference between independence and funding".

What these figures do and don't show

- **Different years.** Each charity’s figures are its latest accounts filed with its regulator, so year ends differ. They are not adjusted for inflation and are not a single year’s total.
- **Never added together.** Charity income and government spending are shown side by side; they measure different things.
- **Some public money does not show in charity accounts.** NHS ambulance services supply some air ambulance doctors and paramedics, and charities can reclaim VAT on some costs; neither is charity income.
- **Government money is as the charity reported it** to the regulator (contracts and grants); the register does not say what each contract was for.

Figures from data/services/search-rescue.json, generated 19 November 2026.

Funded or charity: who pays for each emergency service

Public services · Last updated 19 November 2026 · https://whereyourmoneygoes.co.uk/funded-or-charity/

Police, fire and rescue, NHS ambulances and HM Coastguard are paid for by the taxpayer. The lifeboats, most air ambulances and mountain, lowland and cave rescue are charities: the RNLI reported £4.4m of government money out of £251.3m of income. Figures are each body's latest.

Key figures

£451m
HM Coastguard, 2025-26, taxpayer-funded
As of 15 July 2026

£305.2m
Air ambulance charities' income, latest accounts

£253.8m
Lifeboat charities' income, latest accounts

Side by side

Emergency services: who pays, and how much, latest year each

Service	Paid for by	Spending or income
Police	The taxpayer	£31.6bn (2025-26)
Fire and rescue	The taxpayer	£4.2bn (2025-26)
NHS ambulance services	The taxpayer	£5.5bn (2024-25)
HM Coastguard (Maritime and Coastguard Agency)	The taxpayer	£451m (2025-26)
Air ambulance charities	Charity	£305.2m income (latest accounts)
Lifeboats (RNLI and independent)	Charity	£253.8m income (latest accounts)
Mountain rescue	Charity	£9.5m income (latest accounts)
Lowland search and rescue	Charity	£3.9m income (latest accounts)
Cave rescue	Charity	£10k income (latest accounts)

The first rows are public spending for the UK or the nations covered; the charity rows are income from each charity's latest accounts. They are shown together to make clear who pays for what, not to be added up.
